

THE EPISODES

The series is made up of 52 stand-alone episodes, each one is dedicated to an illness or accident. In choosing the various themes we've taken into account the following factors:

- concentrate on the illnesses / accidents that may also happen to children everyday (therefore avoiding, for example, all the neuro-degenerative diseases, sexually transmitted diseases, and, in general, those associated with adulthood and the senior age);
- avoid illnesses / accidents that are particularly grave or extremely difficult to cure.

List of the episodes

- | | | | |
